Output for Speech and Text Converter that supports translation between multiple languages including English, Hindi, Kannada, Korean, and Japanese.

The user can choose from three main functionalities:

1. Speech to Text

2. Text to Speech

3. Exit

1. Speech to Text + Translation:

In "Speech to Text" mode, the user speaks in the chosen input language, and the system converts the spoken words into text and translates it to the selected output language.

Example: Saying "hi how are you" in English gets translated to Kannada as "ನಮಸ್ಕಾರ, ನೀವು ಹೇಗಿದ್ದೀರಿ".

2. Text to Speech + Translation:

In "Text to Speech" mode, the user inputs text, selects the input and output languages, and the system translates the text and optionally reads it aloud.

Example: Typing "welcome to mysuru" translates to Kannada as "ಮೈಸೂರು ಗೆ ಸ್ವಾಗತ".

```
You said (english): hi how are you
Translation (kannada): ಹಾಯ್ ಹೇಗಿದ್ದೀರಿ

=== Speech and Text Converter ===
1. Speech to text
2. Text to speech
3. Exit

Enter your choice (1-3): 2

Enter the text to translate: welcome to mysuru
